South Africa

Millwright

(Ref. 779913)

The purpose of this role is to perform scheduled and unscheduled maintenance activities on underground plant equipment and trackless mobile machines. Specifically, you will conduct inspections on equipment prior to commencement of maintenance work, execute all maintenance work safely and perform isolation and lockouts and make the work area safe. You will also conduct faultfinding on mechanical and electrical equipment, test and commission equipment prior to handover and identify and record all subsequent work found during the maintenance activity. It will be important to report events and non-conformances and ensure optimal asset life through application of good maintenance practices.

A very responsible role indeed, requiring a Grade 12 with Mathematics and Science/ N3 Technical Certificate/N2 Technical Certificate (internal employees) with a valid Millwright trade test and a minimum of 3 years' experience as a qualified Millwright in a mining environment. A valid Code C/EB driver's licence is essential. Knowledge of SAP will be an advantage, as will experience in an underground mining environment.

Please apply online by entering the preferred position reference number on our website at <http://careers.south32.net> (please enter your email address to access this site).

Practical Training (Community)

Hotazel Manganese Mines, Northern Cape

(Ref. 779917)
